

Washington, DC—U.S. Congressman Mike Pence released the following statement today on the one-year anniversary of the signing of ObamaCare:

"One year later, this is still a government takeover of health care. When you mandate every American have government-approved insurance whether they want it or need it or not, when you create a government-run plan paid for with job-killing tax increases, when you provide public funding for abortion, that's a government takeover of health care, and the American people know it.

"The House of Representatives has taken the right steps to fully repeal ObamaCare as well as taking steps to defund it. We cannot rest until we repeal this government takeover of health care lock, stock and barrel.

"The American people want to face our challenges in health care with more freedom, not more government. Republicans remain committed to reforming health care in a way that reduces costs, promotes personal responsibility, and increases choices available to American patients. By instituting tort reform, strengthening Health Savings Accounts, and allowing Americans to purchase insurance across state lines, we can begin the process of achieving true, sustainable health care reform."
